News of Mine, of Prospect, of Furnace and of Mill.

NEWHOUSE TO HAVE LINE OF RAILWAY

Transportation for Miners, as Well as Wealth of Bonanzas, Requires It.

A feature of the equipment of the Newhouse mines out of Frisco that cannot but emphasize the immensity of that undertaking, although it has not been exploited in the preliminary plans, said a railroad engineer yesterday, is that which provides for an independent line of railway extending from the San Pedro's terminal in the town of Newhouse to the mouth of the mile tunnel, for the army of men that shall find employment underground, the tramway has been, it is said, abandoned in favor of the rail. While the grade will not be necessarily a heavy one it will re-quire the energies of a Shes engine to climb it, and with the machine it is thought the entire needs of traffic will and with most economic results at Bingham and Mercur, notwithstanding the extensive use of the tram system at

RICH LEAD ORES AT UNITED BINGHAM

To be forwarded to the furnaces of the American Smelting and Refining company as soon as a bottom is restored to the wagon road out of Bingham are two carloads of ore from the United Bingham that is reminiscent of days when it was essentially a lend producer, while at a distance of 509 feet in the tunnel the management has feet in the tunnel the management has just driven into a channel, the samples from which reveal as much as 71 per cent of that metal, with 19.8 ounces silver and 81 gold per ton. The new cre varies from eight inches to two feet in thickness, said Manager Joseph, but in the previous stretch it was followed for 250 feet, and what it lacked in breadth was made up in length. Just at present the tunnel is approaching a at present the tunnel is approaching a country in which one of the ore bodies that characterized the early days ought

K. K. CONCENTRATES COM-ING WITHOUT TRANSFER

The recent snowfall at Park City has momentarily at least, done away with the necessity for transferring the product of the Kearns-Kelth mill from the sleigh runner to the wagon wheel, and the entire distance between the plant and the sampler is now made with the former. In no one of the crop of youngsters exploited at the Park is greater interest manifested, and while the management has not permitted it-self to discuss dividends, it was said yesterday that the shares are not to be loosened up at a penny less than \$20

FREE GOLD IN **GOLDFIELD LEDGES**

Special to The Tribune.

GOLDFIELD, Nev., March E.-What may turn out to be the most sensational strike yet made in the Goldfield district is that made during the week on the Lone Star group. This group lies about one and a half miles east and a little to the north of the Combination and is bounded by the of the Combination and is bounded by the Blue Bull on the south. It was recently bonded to T. D. Murphy, Harry Rafsey and H. O. Hall by the owners, McLaugh-lin, Neiligars & Co. A big. strong ledge runs through the group and in prospecting it fine-looking quartz, showing considerable gold, visible to the naked eve, was broken at various points on the ledge. The more work that is done and the deeper it goes, the better looks the rock, and the more gold. No assays have been taken yet, but from pannings it is safe to say en yet, but from pannings it is safe to say that some of it, at least, will go up into the hundreds, and the result of future de-velopment will be awaited with interest

velopment will be awaited with interest by the entire camp.

From the vigor with which they are go-ling after the ore and the fact that it is increasing in value, the lease of Kendall, Patrick & Jones on the January is bound to be a big money-maker, in spite of the fact that it has less than a year to run. There are now three shafts being sunk on the lease, the ore in the third one showing a gratifying increase in value the last few days. A picked specimen yesterday asdays. A picked specimen yesterday as-sayed \$500 to the ton, or a little over \$1 & pound. Another new shaft will be started soon and the present force of forty

learning Mr. Bancroft's opinion after this learning Mr. Bancroft's opinion after this examination.

M. E. E. Wadleigh, who formerly held a responsible position with the Colorade & Southern railway at Denver, has returned, with the intention of making his future home here. He will be joined by Mrs. Wadleigh and the children, who are now in Tonopah, as soon as he completes the residence he is now building.

The Columbia Townsite comeany has a large force of men at work upon a new ditch for the pipe line, which will convey the water from Rabbit spring to the new town at the base of Columbia mountain.

Miss Lillian K. Malcolm has taken options on several mitting properties during the past week and expects to start development shortly. Miss Malcolm has had a wide and varied experience in mining cannes and has many interests at Tonopah, Silver Peak and eisewhere, but feels that Goldfield is the place for her best efforts.

DAY ON 'CHANGE

WAS FEATURELESS

The day on the minly exchange closed with the sale of 15,550 shares of through which the wealth of the mines is to be delivered to the mill. Originally, it is said, the plans of the promoter contemplated an aerial tramway over which to forward the output of the bonanza from the bins at the mouth of the tunnel to those at the mill—a distance of two miles—but as this could not be made to provide transportation for the army of men that shall find employment underground, the tramway is took for \$9508.25, and with the more active traders again inclined to the downward. Daly West, derisively exultant the previous day over those who had been left at the post, receded gradually to \$23.10, while the short took another shot at Daly, and in the face of built tidings from the mine placed it at \$2.25 for delivery thirty days later, with Con. Mercur a neglected offering at 58 cents. Tetro, with stock for \$9508.25, and with the more lected offering at 58 cents. Tetro, with a fresh consignment in the shop windows, was handed out down to 34 cents, while Sacramento, by which the usual \$5000 distribution will be made on April 1st, was traded in around 20 cents. thought the entire needs of traffic will be conserved. The plan is similar to that which has been put into practice, and with most economic results at another crash to 6 cents, while La Reine and with most economic results at Bingham and Mercur, notwithstanding the extensive use of the tram system at the former, but there the miner steps from his boarding-house or dwelling into the mines and transportation, except in isolated places, is not required. The condition at Newhouse renders it necessary to provide transportation for all who are employed at the mines, and to meet this requirement a line of railway appears to be imperative.

another crash to 6 cents, while La Reine was towed in at 4½ cents and Little Chief at 2½ cents, with Star Conputting on the brakes at 15½ cents. Uncle Sam was again provokingly weak, and to bids around 19½ cents responded with quite a bunch, while another wad of Butler-Liberal came out to bids of about 10 cents. Montana-Tonepah rejected a bid of \$1.30, while Ontario was marked down to \$5, and Bullion-Beck to \$1.50, the day closing on the brakes at 15½ cents.

Ore and Bullion.

In the ore and bullion market the day's settlements amounted to \$39,500, McCornick & Co. reporting them as they follow: American bullion \$22,300; gold, silver, lead and copper ores, \$49,990.

In the metal market silver ruled at \$554 cents an ounce, lead at \$3.59 per hundred pounds, and casting copper at 11% cents a pound.

A WEEK'S OUTPUT OF TINTIC CAMPS

Special to The Tribune. EUREKA, Utah, March 25.-The shipments this week from the Tintic district totaled 135 cars, distributed among the

	sayed saye to the ton, or a little over \$1 a pound. Another new shaft will be started soon and the present force of forty men added to. Two men have been put to work on the Mohawk group, which joins the Combination on the east. In running tranches they have uncovered a ledge of reddishboroun quartz which looks different from any feind here before, but which pans gold freely. Dick Colburn, acting for West Virginia parties, has bonded a group of six claims on Columbia mountain, with a water right developed close to Rabbit spring, from the owners. Stinler, McNafmara, Smithline & Horton. Arthur Winslow, a prominent mining arthur Winslow, a prominent mining man of Boston, who is largely interested in Colorado mines, has been in camp for the past week looking over the Combination, of which he is one of the owners. He finds the mine better than ever and is making arrangements to acquire a water supply for the contemplated cyanide plant in which the ores running less than \$160 per ton will be treated. George J. Bantroft, who was the engineer in charge of the mining properties of the Stratton estate at Cripple Creek, has been in camp for a couple of days, and will make a thorough examination of the Goldfield district. Many Coloradoans, both hare and at home will be interested in	Total	Large, superbical and long-every room. ANOTHER RICH STRIKE AT THE LUCKY BOY

From the Lucky Boy of Idaho arrived another consignment of buillon yesterday notwithstanding the heavy fall of snow. News also comes from the proper-ty, which has been long controlled by Salt ty, which has been long controlled by Salt Lake taient, that in the workings below the 30d-foot level are in a solid mass of ore running well up in silver and gold the Prospector commenting on the discovery as follows: "The fact that the Lucky Boy has rich ore in the bottom of the mine should be cheefful news to the people of this section of the county, whose mainstay that property has been for years, as it will no doubt bring to a successful issue the matter of constructing the big power ditch on the Yankee Fork, that is at present given consideration by the company."

PROSPECTING UTAH FOR GOLD PROPERTY

Pending the adjustment of labor troubles at Telluride, Colo., J. H. Shockley, who has under his supervision a number of the most prominent properties in that camp, is scour-ing the camps of this State in search of something that presents an opportunity, a gold-bearing proposition, of course, preferred, although a lead mine will not be rejected. While the troubles at Telluride that have at inter-vals been characterized by bloodshed, have been reported with the usual integrity, said Mr. Shockley, the public has only an imperfect idea of the extremes to which the camp has been driven and while it is one of the most productive of gold in the country and should be one of the most prosperous, the troubles that have prevented have reached a period when something must give way. Mr Shockley will drop down into the Southern country next week, after which he will go to Goldfield, where friends are interested in the Combination group. He congratulates Utah upon the harmonious relations existing between labor and capi-tal and upon the record which is being daily made at the mines, mills and fur-

THE TRIBUNE NEWS STANDS COAL BILLS DROP

Con. Mercur to Afford Room for a Most Important Demonstration Next Week.

With a device that is revolutionizing of ores, Byran Eldrid of Jackson, Mich. came in from the East yesterday and with his father will depart in the next ing results at a saving that is almost incredible. The nearest point at which at that camp. the device has been installed is at Colo rado City, where it is employed at the plant of the Telluride Reduction company. There the method has reduced the consumption of fuel from two to fourteen tons daily to the furnace, and a corresponding reduction is promised at the Con. Mercur The demonstration in the neighboring State is certainly a catchy one and its installation at a point within the diggings of Utah will be awaited with the livellest interest imaginable. There is no doubt whatever concerning reforms that have been made in the coal flelas at many plants where a roaster product is required, said a local mining mar last night. The inventors are here to demonstrate 4. however, and at the Con. Mercur's plant fine opportunity is afforded.

UTAH'S NICKEL MINE IN FAR AWAY NORWAY

The commercial possibilities of his recent acquisition in the diggings of distant Norway having been verified by Martin Christophersen of this city and those, including Senator Smoot, whose support he has rallied instructions will. on Monday, be cabled his son Willard to proceed at once with further develogment and the opening up of a ledge which promises to add not a little to the world's crop of nickel, without ref-rence to the cobalt and copper with which that metal is associated. The in-tention, said Mr. Christophersen, who learned of the mines during a visit last ear to his old home across the water s to sink upon the ledge, block out the nickel, and to follow it up with a con-centrator that will enable the owners to put it into a high grade product. That this may be done with very little expense, said Mr. Christophersen, has already been demonstrated, and upon the undertaking no time will be lost. It has also been decided to incorporate tip-proposition under the laws of Utah, the capitalization to be fixed at \$300,000, with as many shares of the par value of Samples of ore sent out from the discovery in Norway indicate the pres-ence of very high percentages of cop-per, although the analysis shows that nickel predominates. A market for the company's output is promised, as Swansea, to which it will be delivered by water at nominal cost.

HEAVY SNOW FALL AT CAMP OF ALTA

The crop of snow at Alta compares with the heavlest in the history of those diggings, said Superintendent Colbath of the Alta-Quincy, who made the run down on snowshoes yesterday, and it looks now as if the warmth of June suns will be required to expose the grass roots. At the power house on the Columbus Con the element has reared itself above the gables, while to let daylight into the lower windows of the Quincy's lodgings it was necessary to tunnel a distance of twenty-two feet through a solid mass of snow. Mr. Colbath says the crop with which the basin is covered will average, he believes, at least fourteen feet, most of it ice, with no water whatever flowing at present and with no immediate prospects. This condition is not de-laying the campaign under ground, however, and work is progressing steadily at all points.

Tonopah Stock Sales.

THE SLIMES PROCESS RAPIDLY EXPANDING

It having been decided to replace methods formerly in use at the Telluride Reduction company's plant in UNDER NEW DEVICE Colorado with the slimes process devised and put in successful operation by George Moore of this city, that gentleman returned to Zion during the day to learn that experiments have been completed at the Standard company's mines in Bodie, Cal., and that they will be followed at once by the erection of a mill of 200 tons daily capacity. At the Telluride plant in Colorado City a saving of 96 per cent has been made the coal bills in several localities where in the reduction of the telluride ores of roasters are employed in the reduction | Cripple Creek without recourse to other than the Moore method, said the inventor, and with this recovery it has been decided after further experiment, few hours for the big gold mill at the Consolidated Mercur's mines. The device is a simple one, said the gentleman who improvised it, and consists of nothing more than the drawing of the fumes property, to install a plant upon that property while negotiations are pendout of the stack and carrying them ing with several others by which exback into the fire box, thus creating a periments are being made. Mr. Moore back into the fire box, thus creating a periments are being made. slow and uniform heat and accomplish. will remain in Utah several weeks and will go to Mercur in a few days to inquire into the behavior of his machine
